

REACH (SVHC)

Subject: REACH Regulations

Dear customers,

As of June 2007, the European Union Regulation (EC) 1907/2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) entered into force.

Since then substances have had to be pre-registered and a list of Substances of Very High Concern (SVHC) has been created. An updated SVHC list has since been issued and the first deadline for registration of substances is scheduled for 1st December 2010.

We declare that according to the recipes and manufacturing processes of the grades we supplied to your company does not use or add intentionally any:

Substances of Very High Concern (SVHC)

Note that the fact that the above substances are to all intents and purposes absent from those grades do of course not absolutely exclude that toxicologically and/or regulatory irrelevant extremely low trace levels of these substances may be unintentionally present.

Since the presence of those substances under normal conditions cannot be expected, Sumika Polymers Compounds France S.A does not check their absence.

This declaration applies only to the raw materials used, and to the production process of the grades, and may not be extended to end products obtained by:

- Any ulterior modification due to the addition of any other substances not in conformity with the related regulations.
- An improper use of the grades or end product.
- Any processing technique or conditions of use which could lead to the grades deterioration

Please do not hesitate to contact us with any queries.

Kind regards

Nicolas SCHLUTIG
